

REMARKS

The above-identified parent application has been passed to issue. By this Continuing Application, Applicants solicit examination and allowance of the claims currently presented by some of which the controller is specified as being operable to minimize the charging current when the battery temperature is higher than a second predetermined threshold value.

Applicants respectfully submit that the prior art does not teach, disclose or suggest the invention as presently claimed. Accordingly, examination and allowance are respectfully requested.

Respectfully submitted,
D. Wolin, et al.
